

Daniel Vinitsky
4453 Clinton Ave
Minneapolis, MN 55419

Cell: 952-913-7157

Email: daniel.vinitsky@gmail.com

CORE COMPETENCIES

- JavaScript ES6, HTML5, CSS3
- Node.js, Express.js
- ReactJS, EJS
- MongoDB, MySQL
- Java
- Git, Github

QUALIFICATIONS

- Aptitude for translating problems into software solutions.
- Proven ability to quickly learn, understand, and implement new technologies.
- Excellent communication and collaboration skills.
- Several years of professional workplace experience.

PORTFOLIO

danielvinitsky.com :: github.com/dvinitsky

Room Monopoly (*Node.js, Express.js, EJS, JavaScript ES6, HTML5, CSS3*)

Contracted by Youth Forum's Summerfest program, I implemented an efficient back-end using MySQL to connect to my elegant front-end built in JavaScript. Relied on basic login functionality, Express routing, and EJS templates to bring the solution to life.

SpotifyBPM (*ReactJS, JavaScript ES6, HTML5, CSS3*)

I desired a personalized music search system by BPM (beats per minute) within my Spotify library, but no such solution existed. I engineered this app for my own use to solve the problem, utilizing the Spotify API and implicit login flow.

Crossword Assistant (*Node.js*)

While solving Cryptic Crosswords (a hobby of mine), I wished I had a tool that would allow me to search the dictionary for possible matches to the answer outlines I had. I built this simple Node program to read in a file, process data, and then output it.

PROFESSIONAL EXPERIENCE

The National Theatre for Children, Golden Valley, MN

April 2015 – Present

Data Manager

- Generate and maintain clean HTML and CSS code for marketing emails
- Engineer and improve database solutions using both code and Salesforce's built-in workflow tools
